EDUCATION

Stanford University - B.S. in Computer Science: Computer Engineering Track

Expected June 2025

Relevant Coursework:

- Object-Oriented Programming
- Hardware Architecture
- Graphics
- Operating Systems
- Circuits
- Mathematical Foundations of Computing
- Digital System Design
- Electricity and Magnetism
- Performance Optimization

SKILLS

Programming Languages: Assembly, C, C++, C#, HTML & CSS, Java, LaTeX, MATLAB, Python, Verilog

Prototyping: CAD (Autodesk Inventor), 3D-printing slicers (Ultimaker Cura), Vivado Design Suite

Digital Media: Adobe Creative Cloud (Illustrator, Lightroom, Photoshop, Premiere Pro), Blender, Unity Engine

Productivity: Git, Google Workspace, Microsoft 365

Amazon Web Services: DynamoDB, EC2, Lambda, SageMaker

PROJECTS

Open Action Camera

2022 – present

Creating an open-source action camera. Designing video capturing software, OLED GUI, hot-swappable Li-ion power supply, and 3D-printable, high-durability enclosures compatible with a range of mounting systems.

RTL Music Player + Visualizer

2023

Programmed an FPGA into a music player. Player read notes and time values from a ROM and generated sine waves to send to an audio output in real-time. Supported combining simultaneous notes into chords. Expanded functionality included track selection, fast-forward, rewind, and displaying waveforms via HDMI.

Bare Metal Console + Wireless Chat

2022

Built a desktop terminal running bare-metal on ARM. Programmed memory management system, drivers for input and graphics, shell, and commands. Integrated reliable two-way communication platform by writing wireless microcontroller driver, microcontroller firmware, and chatroom application.

TECHNICAL EXPERIENCE

Board-Level and Physical Design, Open-Source Silicon @ Stanford

May 2024 – present

- Producing an integrated circuit and PCB for a convolutional neural network accelerator that identifies anatomical parts in view of a surgical endoscope.

XR Research Assistant, Virtual Human Interaction Lab (Stanford, CA)

September 2023 – June 2024

- Built interactive XR environments and experiments in collaboration with researchers and the California Academy of Sciences through Virtual Reality Intensive Training Seminar (VRITS)

Analog Computing Research Assistant, Stanford School of Engineering

June 2023 – August 2023

- Developed new programming tools (language, validator, compiler) for nontraditional computational platforms aimed at high-speed and high-efficiency applications

Data Analyst Intern, Hubbub (remote)

July 2022 – September 2022

- Wrote software to monitor and visualize prevalence of monkeypox epidemic
- Leveraged Amazon Web Services and Microsoft Power Platform to process and store data

Cofounder / Chief Technology Officer, WAVE. (Berkeley, CA)

June 2019 – July 2019

- Through startup incubator, led team across financing, marketing, and media production
- Prototyped rugged, weather-resistant sensors for waste management and pollution reduction
- Programmed autonomous waste level sensing and wireless data reporting

INTERESTS

- 3D-printed skateboards
- Mountain biking
- Homemade handheld computers
- Tennis
- Stanford Racing pit crew
- Ultimate frisbee
